Purple's Reign

We usually rely on lavender when we want to relax. But it can help nails mellow out, too. "Lavender is an easy, less-intense way to try purple if you're uncomfortable wearing strong colors," says manicurist Sheril Bailey. Be sure to choose a version with shimmer, such as Lippmann Collection Nail Lacquer in Purple Rain or Orly Nail Lacquer in Prim & Proper, she says. "Matte lavenders can look flat." Both of these shades work well on all skin tones, says Bailey. The only difference is the number of coats. For dark skin, one application is enough; on those with fair skin, two coats will create a contrast.
